

PROFESSIONAL SUMMARY

Full-Stack AI Engineer who builds the whole product end-to-end, integrating React/Next.js front ends, NestJS/Postgres back ends and APIs, and an AI orchestration layer (multi-model routing, MCP, real-time agents). Proven ability to deliver robust solutions across the full stack, leveraging modern frameworks and AI technologies for impactful results.

SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), React 18/19, Next.js 14/15/16, NestJS, Tailwind CSS

Databases & ORMs: Supabase, PostgreSQL, Neon, Prisma, MySQL, Firebase Auth

APIs & Middleware: NestJS (REST APIs, modules, guards), Next.js route handlers, Twilio (webhooks, signature verification, STIR/SHAKEN)

AI & Orchestration: OpenAI (GPT-4/5), Anthropic Claude (incl. Opus), Google Gemini, Vapi (tool-calling), Multi-agent pipelines

Cloud & Hosting: Vercel, Railway, AWS RDS

Payments & Comms: Stripe (Checkout, webhooks, subscriptions), Resend (transactional email)

Analytics & Visualization: Google Maps Platform, Chart.js, React-Globe.gl, DataForSEO, Google Analytics 4

PROFESSIONAL EXPERIENCE

Freelancer – High Ridge, MO

Data Solutions Consultant & Developer | March 2025 – Present

Solo Platforms & Products

- WorkAide Jobs (<https://jobs.workaide.ai>): Owner-Developer; delivered an AI job-search workspace in ~48 hours, enabling users to aggregate job listings, score fit against resumes, and generate tailored applications using Next.js 16, Supabase, Stripe, and OpenAI. Led project management and product deployment while actively utilizing it for personal job searches.
- EZ Voice (<https://voice.ezweb.work>): Owner-Developer; engineered a multi-tenant Agentic AI phone-assistant SaaS leveraging NestJS and Vapi, providing real-time voice answering, appointment booking, and SMS functionality with Twilio, achieving improved customer engagement across small businesses.
- EZWeb.work (<https://ezweb.work>): Owner-Developer; built a full-stack agency operations platform integrating project management, Agentic AI workflows, and multi-agent content delivery, utilizing Next.js and Supabase for enhanced client services and operational efficiency.
- SEO.Lowrys.org: Developed a multi-agent AI platform for SEO optimization using n8n and Google Cloud KMS, ensuring data security while automating reporting tasks and providing analytics to clients.
- Alrtisan.net: Independently architected and developed a blockchain-based art authentication platform for high-value collectors with a React frontend, Firebase backend, and AI computer vision integration concepts, ensuring a secure and user-friendly experience.
- CT Home Remodel (<https://www.cthomeremodel.com>): Delivered a client marketing site using Next.js 14, Tailwind and Resend, showcasing enhanced user interaction and streamlined lead generation processes that increased client inquiry rates.

Contract, Nike Extrusion Operations (Mindlance)

Manufacturing Data Engineer & Industrial IoT Consultant | January 2026 – May 2026

- Architected an OT-to-IT data pipeline integrating Kepware and ThingWorx for manufacturing visibility, enhancing real-time analytics and operational efficiency across the factory floor. Documented processes to ensure compliance and future scalability.

- Resolved data integrity issues, remediating prior gaps in sensor data with an on-premises solution that captures terabyte-scale data in real-time, supporting predictive maintenance and reducing future operational costs.
- Designed a dashboard for visualizing real-time machine data, enabling operators to optimize extrusion processes and improve product quality. Highlights included historical data analysis for operational insights.

Ameren – St. Louis, MO

Power Platform Architect & Solutions Developer | August 2022 – March 2025

- Consolidated enterprise data into a single Dataverse source, enabling unified reporting and governance for 27 shared services using Power Automate, Power Apps, and Power BI to streamline internal processes and enhance decision-making.
- Built secure ETL pipelines automating flows to reduce manual interventions and streamline project management processes across diverse teams with a focus on efficiency and risk mitigation in complex projects.
- Developed an interactive dashboard that allowed stakeholders to visualize KPIs in real-time, significantly boosting the team's ability to manage and forecast project outcomes effectively.

Project Manager, IT/OT Cybersecurity & IT Programs | June 2017 – December 2023

- Managed IT and cybersecurity programs with budgets exceeding \$50M, focusing on risk management and compliance within critical infrastructure environments, ensuring all projects adhered to regulatory standards.
- Implemented centralized reporting systems, IDS tuning, and report customization for enterprise security monitoring, which enhanced threat detection and response coordination across multiple facilities.
- Established resource management processes, effectively overseeing the allocation and utilization of project resources while ensuring team members were adequately trained and equipped to meet their project goals.

Project Controls Analyst | May 2016 – June 2017

- Audited project compliance to ensure adherence to PMO methodologies, maintaining a portfolio compliance repository to facilitate executive reporting and reporting on critical project milestones.
- Developed and maintained project plans, schedules, and budgets while ensuring all documentation was compliant with organizational requirements, which improved project transparency and accountability.

CSX Transportation – St. Louis, MO

Signalman, Conductor, Operator | June 1998 – 2014

- Led deployment of electriccode signal systems replacing pole line signaling on major rail routes while ensuring safety and compliance with Federal Railroad Administration (FRA) standards across multiple states.
- Managed installation and upgrade of public crossing protection systems, enhancing safety and operational efficiency while maintaining rigorous safety standards in all operations.
- Coordinated train operations and maintenance, fundamentally improving efficiency and reducing delays in freight logistics, contributing to overall company performance.

EDUCATION

Bachelor of Science in Information Management

Webster University | Webster Groves, St. Louis, MO | 2017

Magna Cum Laude | GPA: 4.0

Coursework in Computer Programming

St. Louis Community College | Ferguson, MO | 2014-2015

GPA: 4.0 | *Transferred to Webster University*
