

JIM LOWRY

PROFESSIONAL SUMMARY

AI Solutions Architect with 10+ years of Microsoft platform expertise and proven success architecting commercial-grade AI platforms. Specializes in multi-agent systems, strategic AI collaboration, and enterprise security implementation. Successfully built three enterprise applications demonstrating advanced AI architecture while translating complex business requirements into scalable solutions that drive measurable outcomes.

CORE COMPETENCIES

- AI & Architecture: Multi-agent systems, prompt engineering, AI workflow orchestration, Model Context Protocol
- Microsoft & Data: Power Platform (BI, Apps, Automate, Dataverse), ETL, predictive analytics, data modeling
- Development & Cloud: Next.js/React, TypeScript, Google Cloud KMS, Firebase, Vercel, n8n
- Security & Integration: Enterprise encryption, MFA, API integrations (DataForSEO, GA4, BLS)
- Leadership: Project management, cross-functional team leadership, stakeholder management

PROFESSIONAL EXPERIENCE

Self-Employed – High Ridge, MO

AI Solutions Developer & Full-Stack Engineer March 2025 – *Present*

- Pioneered AI-assisted development workflows combining strategic prompt engineering with multi-model coordination
- Architected enterprise-grade multi-agent AI platform with 5 specialized business intelligence agents coordinating through custom Model Context Protocol
- Implemented Google Cloud KMS security with hardware-backed AEAD encryption across 36+ API endpoints
- Developed AI workflow orchestration using n8n with dynamic agent coordination and session management
- Integrated professional APIs in DataForSEO, GA4, Search Console, enabling autonomous competitive analysis
- Created React-based blockchain certification platform for high-value art with AI computer vision concepts
- Built Next.js/TypeScript predictive analytics processing 50,000+ BLS records with ML-based forecasting

Ameren – St. Louis, MO

Data Analyst, Project Manager & Data Systems Developer May 2016 – March 2025

- Advanced from PMO Analyst to Project Manager to PMO Data Systems Developer
- Managed a portfolio of ~12 cybersecurity projects coordinating vendors, schedules, and stakeholders
- Developed BI solutions integrating multiple data sources into dashboards serving 200+ PMO users
- Improved project delivery timelines through data analytics across 100+ projects, optimizing resource planning
- Implemented data modeling best practices and ETL processes ensuring data accuracy and reliability
- Provided training on Power BI tools and analytical methodologies to increase adoption

CSX Transportation - St. Louis, MO

Signalman, Conductor, Remote Train Operator June 1998 – May 2014

- Implemented advanced signaling systems across multiple states maintaining FRA safety standards
- Managed train operations within regulatory requirements and compliance frameworks

NOTABLE PROJECTS & PLATFORMS

- **SEO.Lowrys.org - AI SEO Strategies Platform:** 5-agent system with Google Cloud KMS security, n8n workflow automation, and professional API integrations providing autonomous SEO intelligence
- **Alrtisan.net - Art Authentication Platform:** Blockchain-based platform with Firebase backend, React frontend, and AI computer vision concepts for artwork verification
- **Lowrys.org: - Professional Site:** Next.js/TypeScript platform processing 50,000+ records with ML forecasting, real-time visualization, and ETL pipelines

EDUCATION

Bachelor of Science in Information Management

Webster University | Webster Groves, St. Louis, MO | 2017

TECHNICAL SKILLS

- **AI/ML:** Multi-agent systems, Claude Sonnet, GPT-4 Turbo, prompt engineering, workflow orchestration
- **Security:** Google Cloud KMS, AES-256-GCM, MFA, JWT, RBAC, Firebase Authentication
- **Web/Cloud:** Next.js, React, TypeScript, Vercel, Firebase, n8n, Turso/LibSQL
- **Data/Analytics:** Power BI, Chart.js, SQL, ETL pipelines, predictive modeling, data visualization
- **Microsoft:** Power Platform suite, Dataverse, DAX, M, Advanced Excel, Office 365
- **APIs/Integration:** DataForSEO, GA4, Search Console, BLS, RESTful development
- **Blockchain:** Digital provenance, certification concepts, decentralized application architecture

MILITARY TRAINING & CERTIFICATIONS

- U.S. Navy | Interior Communications Electrician Training
- MECP Expert Installation Technician Certification

ADDITIONAL INFORMATION

Skilled at bridging business strategy and technical execution through AI-enabled solutions. Expertise in human-AI collaboration methodologies for enterprise applications. Open to AI Solutions Architect, AI Product Manager, and Digital Transformation leadership roles.
